

BOW HABITAT STATION

GRADE FOUR PROGRAMS

FULL-DAY PROGRAM

Through inquiry and exploration, our programs encourage students' curiosity while supporting Alberta Education's Programs of Study.

MARVELOUS MICROBES

INCLUDES
WORKBOOK!

\$325/Class
4.5 hours
Indoors

Investigate the importance of microbes and how humans make and manage waste. Students explore water recycling and how the waste of over a million trout is managed at Bow Habitat Station.

CUSTOMIZE YOUR ADVENTURE

Select two of the following activities to customize your learning experience at Bow Habitat Station:

FILTRATION INVESTIGATION

Indoors

Get into the nitty gritty of water by building and testing a filter.

MARSH MYSTERIES

Indoors

Get to know some of Alberta's underwater critters. Investigate invertebrates under a microscope and sketch their life cycle stages.

TRAIL TREKKING

Outdoors

Discover what it's like to be a naturalist as you trek through our Interpretive Wetlands, and learn about the creatures who make their home in this urban environment.

WETLAND WONDERS

AVAILABLE SEP, MAY, JUN

Outdoors

Have buckets of fun marsh dipping! Search for invertebrates that live among the cattails in our Interpretive Wetlands. *Rubber boots recommended.*

Class sizes are based on a maximum of 26 students.

Adult supervisors required at a mandatory ratio of 1:6.

Experienced program staff lead all programs and activities.

Teachers receive an information package before they arrive to help prepare for their visit.

Program cost includes admission to the Discovery Centre.
